Priority Routine ☐ Urgent ☐ Emergency ☒	**Affected Release** B	**Change Class**

Title (description) Performance testing of the new version of AutoSys, 3.3.

Documents Affected none	**Source Nos** (RID, NCR, etc.) **or Tech Reference**

RTM Change   ☐   **Start New Baseline** ☐

Problem Need to reconfigure workstations to test the performance of AutoSys 3.3. and add new AutoSys remote agents

that are not part of the mini-DAAC.

Proposed Solution Upgrade currently installed AutoSys 3.2 to version 3.3 on Mummy, Sdps2, Chimera, and
Nessie to act as AutoSys remote agents running "sleep jobs".
Install AutoSys version 3.3 on Seagull, Bigfoot, and Deepsea to act as AutoSys remote agents running
"sleep jobs". These new AutoSys agents will eliminate the need to use mini-DAAC hardware for AutoSys
performance testing (reference approved CCR 96-0437 which upgraded Monet to a Sun 20/712 machine to support
AutoSys performance testing).
